

Lincoff rules for finding primary break

**SUPERIOR TEMPORAL OR NASAL DETACHMENTS**  
In 98% of the cases, the primary break lies within 1-1/2 clock hours of the highest border

**TOTAL OR SUPERIOR DETACHMENTS THAT CROSS THE 12 O'CLOCK MERIDIAN**  
In 93% of the cases, the primary break is at 12 o'clock or in a triangle, the apex of which is at the ora serrata and the sides of which intersect the equator 1 hour on either side of 12 o'clock

**INFERIOR DETACHMENTS**  
In 93% of the cases, the higher side of the detachment indicates on which side of the 6 o'clock meridian an inferior break lies. When an inferior detachment is bullous, the primary break lies above the horizontal meridian
